

NUTRI Cu

EC FERTILIZER COPPER FERTILIZER SOLUTION

It is a liquid fertilizer containing copper. It is the result of the latest technology that makes it possible to formulate highly concentrated products with extreme chemical purity that can improve the biochemical functions of copper. In addition to eliminating copper deficiencies, it accelerates enzyme activity, especially in cereals, and thus supports fruit formation by reproducing cells. Thanks to its moist and sticky substances, the product has a high absorption capacity in the leaves and stomata, helping to transport the elements quickly to the tissues where they are needed. It is effective against disorders caused by copper deficiency and also promotes the formation and ripening of ears in cereals.

It helps especially against the following disorders:

- Yellowing of the tips of young leaves of fruit trees due to copper deficiency
- Whitening and deformation of citrus fruits
- Complete yellowing of cereals and yield reduction
- Against bluing-greening of young leaves in vegetables. It facilitates leaf fall in autumn in nurseries.

GUARANTEED ANALYSIS:

Water Soluble Copper (Cu) 5%

Packaging Types: 1Lt

USAGE AND DOSAGES:

PRODUCTS	APPLICATION FROM LEAF	APPLICATION FROM SOIL
Greenhouses	200 cc/100 L water	1,5 L/da
Open Vegetable	200 cc/da	1,5 L/da
Fruit Trees And Vineyard	200 cc/100 L water	1,5 L/da
Industrial Plants	200 cc/da	1,5 L/da
Green Areas	200 cc/da	1,5 L/da
